REPORT

OF

The Committee of Visitors

OF THE

County Lunatic Asylum,

AT THE

EPIPHANY SESSIONS, 1863.

Southampton, to wit.—At the General Quarter Sessions of the Peace of Our Sovereign Lady the Queen, holden at the CASTLE OF WINCHESTER, in and for the said COUNTY OF SOUTHAMPTON, on Monday, in the first Week after the twenty-eighth day of December, 1862, to wit, the fifth day of January, in the twenty-sixth year of the Reign of our Sovereign Lady Victoria, by the Grace of God of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, and in the year of our Lord One Thousand Eight Hundred and Sixty-three, before THE RIGHT HONORABLE CHARLES SHAW VISCOUNT EVERSLEY, Chairman, THE RIGHT HONORABLE HENRY HOWARD MOLYNEUX EARL OF CARNARVON, SIR WILLIAM HEATHCOTE, BARONET, MELVILLE PORTAL, ESQUIRE, and others their Fellows, Justices of our said Lady the Queen, assigned to keep the Peace of our said Lady the Queen, in the County aforesaid: and also to hear and determine divers Felonies, Trespasses, and other Misdeeds, committed in the same County:—

By the Court.

ORDERED, that the Report of the Committee of Visitors of the County Lunatic Asylum, presented to this Court, be printed, as soon as the Receipt and Expenditure Accounts are duly received, and that Copies be transmitted to the several acting Justices, and to the Boards of Guardians of the several Unions within the County.

FARR.

REPORT.

THE Committee of Visitors of the Hants County Lunatic Asylum beg to submit to the Court of Quarter Sessions their Annual Report of the condition and progress of the Establishment, and they have the satisfaction of informing the Court that the results of the past year have been of a favourable character.

At the last Meeting of the Visitors on the 27th December, the number of the Patients on the books amounted to 267 Males and 317 Females, total 584; being an increase of 25, as compared with the previous year. This increase would have been larger, had not the Visitors determined, with the consent of the different Boards of Guardians, to remove 24 harmless Chronic Lunatics on a month's trial to their own Workhouses. These Patients have been so favourably reported of by the Medical Officers of the different Unions, that they have since been discharged from the books of the Asylum, and thus the great pressure on the Establishment has been in some degree relieved by this reduction.

In addition to these Chronic Cases, no fewer than 81 Patients have been discharged as recovered.

This amount of recoveries greatly exceeds that of previous years.—In 1860, out of 658 Patients under treatment, there

Number
Patients
Asylum
discharg
Chronic
to Work

Recover

were only 47 cases of cures; in 1861, with 683, the recoveries were 61; and, during the past year, the cures, as above stated, amounted to 81, out of 750 Patients under treatment.

Your Committee have also the satisfaction of informing the Court that the low rate of Mortality alluded to in the last Report, has been still lower during the past year, as the deaths have only amounted to 55, or less than 10 per cent., on the daily average.

In their last Report, your Committee stated that considerable alterations had been completed on the Female side of the Asylum, at a cost of about £1,500, affording additional sleeping accommodation for about 46 or 48 Patients; and the Court was also informed, that a further outlay would still be necessary for the enlargement of two Day Rooms, in order to meet this large increase in the number of Female Patients.

These alterations have now been completed at a cost of £396; the Rooms are occupied, and from their increased size add much to the comfort and quiet of the Patients inhabiting the Wards to which these Rooms are attached.

During the past year the Male side of the Asylum has been inconveniently overcrowded, and your Committee have been compelled to carry out several slight alterations, in order to meet the requirements of the Division. The work is now nearly completed, at a very trifling cost, and additional accommodation has been provided for about 20 Patients, at an expense not exceeding £60 or £70.

The crowded state of the Asylum for a considerable period during the past year, and the large increase in the number of admissions, has been a cause of much anxiety to the Visitors, and, after a careful consideration of this important question, your Committee have arrived at the conclusion that it is undesirable, on many accounts, to increase the size of the Asylum beyond its present limits.

Crowded s
of the Asy

Originally constructed to contain 400, or, at most, 440 Patients, the Asylum has, from time to time, been enlarged, until it is now capable of receiving, without difficulty, upwards of 590 Lunatics—as large a number as, in the opinion of your Committee, should be placed under the charge of one Superintendent.

Under these circumstances, your Committee determined, as a precautionary measure, to give notice to the authorities of Portsmouth of the intention of the Visitors to determine the yearly existing Contract with the Borough at Michaelmas next.

Notice to
Portsmouth
Borough
respecting
Yearly Con

Although your Committee have, in the execution of their duty, felt compelled to give this notice, yet it is hoped, that arrangements may still be made, with the authorities of Portsmouth for the retention of a portion of their Pauper Patients, should the number of Lunatics in the Asylum permit of such an agreement, and the Borough be willing to accede to such a proposal.

Should, however, the Portsmouth authorities determine to remove all their Patients, at the expiration of the Contract, your Committee have no doubt that the vacancies can easily be filled up by the admission either of Pauper Lunatics

from other overcrowded Asylums, or of Private Patients, at a higher amount of payment than that charged for Paupers.

In the last Report, it was stated that application had been made by the Visitors to the Sureties of the late Treasurer, for the balance due from him to the Asylum. Your Committee have now the satisfaction of informing the Court that the whole of this balance, amounting to £769:6:5, has been since paid over to the Visitors.

At the time of the presentation of the last Report, various plans for the future management of the Asylum accounts were under the consideration of the Visitors. Satisfactory arrangements have since been completed with the Bank of England, and the accounts have been transferred to the Branch Bank of England, at Portsmouth, and your Committee are enabled to inform the Court that the new system has hitherto worked without either difficulty or inconvenience.

During the past year, two Acts of Parliament have come into operation, both of which, in a greater or less degree, will affect the condition of County Lunatic Asylums.

By the 24 and 25 of Vict., cap. 55, which came into operation on the 25th of March last, the cost of maintenance of Pauper Lunatics in Asylums is now charged on the common fund of the Union, and there appears much reason to believe, that this alteration will have a tendency to induce small Parishes to send to the Asylum Lunatics, who have hitherto either been kept in Workhouses, or who have been in the charge of Friends with an allowance from the Parish for their support. The large increase in the number of admissions during the last nine months is, in the opinion

of your Committee, in some degree attributable to the operations of this Act.

The second Act to which your Committee would refer is, the 25 and 26 Vict., c. 111. Considerable powers are given by this Act to the Visitors of Pauper Lunatic Asylums, not only to enter into Contracts with Boards of Guardians for renting a portion of their Workhouses for the reception of Chronic Cases, but also for hiring Houses, or other Buildings, for the same object.

25 & 26 V
cap. 111

Your Committee are hardly prepared, in the present Report, to express any very decided opinion as to the effects of this Act, but they are inclined to believe, that considerable alterations will be required before it can be beneficially applied to the relief of over-crowded Asylums.

The usual Tables are in preparation, as well as the Yearly Financial Statement, and will be ready for presentation at the next adjourned Sessions.

As far as can be at present ascertained, the receipts, exclusive of balances, have amounted to £14,017, and the expenditure to £13,566, in which latter amount is included the cost of the alterations of the Day Rooms on the Female side of the Asylum, and of the additional sleeping accommodation in the Male division.

Financial
Statement

In conclusion, your Committee have much satisfaction in again recording their opinion of the zeal and energy displayed by their Superintendent, Dr. Manley, and by the various Officers of the Asylum, in the performance of their arduous and responsible duties.

HENRY CHOLMONDELEY,

Chairman.

WICKHAM,

December 26th, 1862.

MY LORD AND GENTLEMEN,

The importance attached to all things bearing on the moral and spiritual welfare of the Asylum, naturally renders the drawing up of my Annual Report a matter of lively interest. Still no one that is entrusted with any spiritual charge can review without mingled emotions his ministerial experiences during a single year. The retrospect has its lights and its shadows. There must be much to humble, however large a blessing may have been granted to his ministrations, and he may be determined, trustfully and cheerfully, to persevere, thanking God and taking courage. My own case can form no exception to such general experience. I have in the first place to report my regular performance during the past year of the appointed services both in the Chapel and the Wards. It is with much thankfulness that I am able to reiterate the encouraging language of former years. The Chapel has had the usual proportion of patients and attendants. There have been no interruptions to the prevailing quiet and decorum. The opportunities of receiving Scriptural instruction and consolation have seemed valued as heretofore. The afflicted have been cheered and sustained by kindly intercourse with

them, and by the general sympathy and interest shewn in their several cases. To some of the large number restored to their friends, affliction has proved, I hope, a real blessing; and all, I believe, have left truly grateful for all that was so kindly done for their comfort and relief.

There is one circumstance at which I greatly rejoice. I allude to the establishment of the evening school on the female side: it appears to be answering its purpose admirably. I consider it in excellent hands, and it cannot fail to be a boon alike to all who avail themselves of it, whether patients or attendants. Such a school is likely to become very useful in maintaining the healthy tone and character of the Asylum.

The Holy Communion has been administered by me four times since my last report, and the Burials in the Cemetery have amounted to forty-four. It only remains for me to express my anxiety zealously to perform the duties of my Office, and to subscribe myself,

My Lord and Gentlemen,
Your very faithful and obedient Servant,

G. H. MASON,

Chaplain.

The Lord H. Cholmondeley,
Chairman of Committee,
Hants County Lunatic Asylum.

HANTS COUNTY ASYLUM,

27th December, 1862.

MY LORD AND GENTLEMEN,

When I presented my last annual Report I stated that there were then in the House 244 Male and 315 Female Patients. On looking at the cases of all these individually, I could expect recoveries in only 17 Men and 27 Women; 61 Males and 83 Females were, from various circumstances, incapable of any occupation and many of these helpless beings were in very feeble health. With such unpromising materials to work upon it would naturally be expected that the year just ended would have been marked by a heavier mortality than usual and by a lower per centage of recoveries. Strange however as it may seem, the recoveries have been more numerous and the deaths fewer than usual. It will be interesting therefore to endeavour to ascertain, if possible, to what causes this unexpected result can be attributed. Firstly, then, the number of Patients admitted is far in excess of that of any year since 1856 and 1857, during which chronic Lunatics belonging to the Boroughs of Portsmouth and Southampton were removed to this Asylum.

Secondly, the number of curable cases or those whose duration was of recent date on admission preponderates

greatly over the number of chronic cases that have this year been sent here for detention. I may add too, that the health of the Patients in general was moderately good. To this improved condition then we must refer, in a great measure, for the lower per centage of mortality. As a rule, the great majority of deaths which take place in Asylums are the result either of disease contracted before admission, which terminates fatally after a short period of residence, or are attributable to a general breaking-up of the constitution, occasioned often by old age; but more frequently to a gradual decay of the vital powers from the altered condition of the brain and nervous system, whereby the general nutrition of the organs and tissues of the body is interfered with.

Acute bodily disease, dangerous to life, is according to my experience rare rather than otherwise, and when it does occur, it is usually very insidious in its development; but Epilepsy, General Palsy, and Pulmonary Consumption tend largely to swell the mortality amongst the inmates of our wards.

Can we account for the unusual number of admissions during the last 12 months? I think we can, in a great measure. On the 25th of last March, an Act of Parliament came into operation, by which all pauper Lunatics confined in Asylums were made chargeable to the general fund of the Union in which their parishes were situated. Thus there is now no pecuniary inducement to a parish to detain an acknowledged Lunatic at home or in a Union Workhouse; for there the whole cost of maintenance would fall on his own parish. Such persons are now therefore sent to the

County Asylum without any unnecessary delay and the result is, that coming under appropriate treatment at an early period of the disease and being placed under circumstances favorable to recovery, the cures from Insanity may be expected to exceed those of former years, not only here, but in all similar Institutions ; and in proof of this statement, I would refer you to these statistics :—

During the year 1859, of 121 Patients admitted, 38 were brought to the Asylum before the 25th of March, and 83 subsequently to that date.

In 1860, of 149 Patients, 34 were admitted before and 115 after 25th March.

In 1861, of 160 Patients, 34 were admitted before, and 126 after 25th March, whilst of 191 admitted in the present year, 32 only were brought before the 25th of March, the day on which the new Act came into operation, and 159 subsequently to that period.

On the other hand, many Imbeciles, Idiots, and Chronic Lunatics, who would under the old system have in all probability ended their days in a workhouse, will now doubtless be sent to Asylums on any outbreak of excitement, which would formerly have been overlooked. We may therefore expect that the tendency of this Act will be gradually but surely to accumulate a larger number of incurable Lunatics in our Asylums than has hitherto been the case.

By a very recent Act of Parliament 25 and 26 Vict. cap. 111, sec. 8, it is now in the power of the Committee of Visitors of County Asylums to make arrangements with

Boards of Guardians, if they shall see fit, under certain conditions, for the reception of a limited number of Chronic Lunatics into union workhouses. It remains to be proved whether it will be possible for this County to avail itself of the benefit of this Act for the purpose of relieving the pressure arising from the accumulation here of a number of Chronic Cases. My own impression is, that as the clause of the Act now stands, the Committee will not derive any advantage from the power granted them, but that the Act will be useful where Asylums are situated near large towns, having Workhouses larger than necessary for their pauper accommodation. I venture to express this opinion very strongly, not that the proportion of Chronic and Imbecile admissions has really up to the present time exceeded that of former years, but because having recently selected a number of chronic harmless Patients for removal to Unions where their Guardians were willing to receive them, I find that it has been already considered necessary by the Authorities to return several of them to the Asylum. These Patients so returned have since their re-admissions conducted themselves as tranquilly and orderly as they did before their transfer.

There is one other matter of experience that I must not omit to mention whilst speaking of the causes of accumulation of Lunatics in Lunatic Asylums, and that is the longer duration of life amongst the Insane now than formerly, when they suffered from want of care and privation of the necessaries of life. We may be sure, for these several reasons, that the number of Lunatics brought together in Asylums will increase year by year for a long time to come.

I could adduce many instances of the great desire of persons laboring under Insanity to avail themselves of the benefit of an Asylum now that the opprobrium which once attached itself to the so-called madman has ceased to exist, now that Insanity is acknowledged to be a curable disease, and Asylums are regarded as hospitals rather than places merely of confinement. Many of our Patients suffering from recurrent Insanity seemed pleased to return, and several who have been under treatment have been unwilling to leave after recovery. Were Asylums again to be made prisons, the prestige now attached to them would soon be lost. Confidence from Insane persons must be won by placing confidence in them. There are, however, in every community some restless spirits, some ill-disposed and ill-conditioned minds, which kindness does not conciliate, and when the little power of self-control which once existed in them has been lost by disease, acts of violence are occasionally committed without any assignable reason. For the safe custody of such County Asylums are not suitable places of detention. There are now under treatment here several Patients with strong homicidal propensities. Some of them will shortly be removed to the new criminal Lunatic Asylum at Broadmoor, but others even of our most dangerous characters will be irremovable because they have not come to us under a warrant from a Secretary of State. Happily for all around them outbreaks of violence may generally be anticipated, and some precautionary measures adopted for the safety of others. In Asylums devoted especially to the care of Criminal Patients, the proportion of attendants is much larger than in County Asylums. In County Asylums therefore seclusion is necessary to an increased extent. I am induced to touch on this subject because, on referring to

my journal, I find that seclusions have been more frequent than usual this year for acts of violence not occasioned by maniacal excitement, but the result of delusions, causing in the subject of them a homicidal propensity. In several instances these homicidal propensities have lasted for several weeks without intermission. 22 Criminal Lunatics have been under treatment here during the past year.

I have stated before that 191 Patients have been admitted during the last 12 months; of this number 91 were Males and 100 were Females.

The average number of residents has been 570, and the number now in the house is 583.

The aggregate number of Patients resident in the Asylum during the year has been 750.

Of this number 81 have been discharged recovered and 55 have died.

Thus calculated on the daily average, the deaths have been under 10 per cent, or calculated on the total number under treatment, 7.3 for the year, whilst the recoveries have been over 14 per cent. on the daily average, or nearly 43 per cent. on the admissions.

Including some recent alterations in the internal arrangement of the Asylum, the building can conveniently accomodate 592 Patients; and, on an emergency, the beds might be so placed as to allow of 622 being received. There are then but 9 vacant beds in the Asylum, and it must be borne in mind that there are 24 Chronic Lunatics and Imbeciles in Union Workhouses who were recently

inmates of the Asylum, any or all of whom may be brought back at any moment.

Two useful pieces of machinery, namely, a dough-making apparatus, by Stevens, and a sewing table, of Wheeler and Wilson's, have been purchased during the last year, both of which answer their intended purpose efficiently.

One Married Female admitted in an advanced stage of pregnancy has this year given birth to a child in the Asylum.

The usual Tables are appended; they require no further special comment; but I may mention that it is now compulsory in all instances of death occurring in an Asylum to give notice to the Coroner, who may hold an Inquest on the Body, or not, according to his discretion.

One Patient admitted with Delirium Tremens was on recovery discharged as not Insane.

The Amusements and Recreations mentioned in my former Reports have been continued much to the satisfaction of the Inmates.

It remains now only for me to speak in a favorable manner of the conduct of the Servants of the Establishment, and to thank the Officers associated with me for the willing assistance they have afforded me during the past year.

To you, my Lord and Gentlemen, I am obliged for the kind consideration with which my suggestions have been at all times received, and for the constant support you have rendered me in the discharge of my varied duties.

I have the honor to subscribe myself,

Your obedient, faithful Servant,

JOHN MANLEY, M.D.,

Superintendent.
